

DIRRIR REALTORS LIMITED

Real Estate ERP System Discovery Questionnaire

Use this questionnaire during meetings with software vendors to ensure the proposed ERP system meets the company's operational, sales, accounting and construction requirements.

1. Property & Project Configuration

- How do we create a new project?
- Can one project have multiple blocks/phases?
- Can we manage multiple projects simultaneously?
- Can we archive completed projects without deleting data?
- How does the system handle unit numbering (Block/Floor/Unit/Plot)?
- Can units be imported from Excel?
- Can unit details be updated?
- Can units support USD and KES?
- Can units store floor plans, photos, size, parking, store, balcony and status?
- Can selling prices be changed?

2. Customer (CRM)

- What customer information can be stored?
- Can IDs, passports, KRA PINs and agreements be uploaded?
- Can one client own multiple units?
- Can one unit have multiple owners?
- Can ownership be transferred?
- Can nominees/next of kin be recorded?

3. Sales, Reservations & Unit Allocation

- Can the system prevent double booking?
- Can management override reservations?
- Can reservations be cancelled?
- Does cancellation automatically release the unit?
- Can multiple payment plans exist?
- Can payment plans be customized?
- Can contracts be generated automatically?

4. Installments & Collections

- Can installment schedules be generated automatically?
- Can schedules be edited?
- Can custom payment dates be used?
- Does the system calculate outstanding balance and percentage paid?

5. Accounts Receivable

- Bulk invoices?
- Email invoices?
- Reprint/cancel receipts?
- Support partial payments?
- Allocate payments to deposits/installments?
- Process refunds?
- Generate customer statements and aging reports?

6. Accounts Payable & Expenses

- Attach supplier invoices?
- Stage supplier payments?
- Reconcile supplier statements?
- Link expenses to projects/units?
- Attach supporting documents?

7. Petty Cash

- Dedicated petty cash module?
- Multiple petty cash boxes?
- Print vouchers?
- Attach receipts?
- Perform reconciliations?

8. Accounting

- Manual and reversing journals?
- Multiple bank accounts?
- Bank reconciliation?
- Fixed assets?
- Automatic depreciation?
- Transfer assets between projects?

9. Financial Reports

- Trial Balance
- General Ledger
- Journal Listing
- Profit & Loss
- Balance Sheet
- Cash Flow
- AR/AP Aging
- Project Profitability
- Tax Reports

10. Construction Management

- Track construction stages?
- Update progress percentages?
- Upload site photos?
- Record site inspections?

11. Dashboard

- Sales today/month
- Outstanding receivables
- Project progress
- Construction costs
- Available/Reserved/Sold units
- Collections this month

12. Security

- Role-based permissions
- Project-based permissions
- Restrict financial information
- Two-factor authentication
- Recover deleted records
- Audit trail
- Lock accounting periods

13. Integration & Migration

- Excel integration
- Import customers, suppliers, opening balances and historical transactions

14. Backup & Support

- Backup frequency
- Cloud or on-premises
- Recovery time
- Offline capability
- Support hours
- Software updates

15. Contract Management & Post-Sales Changes

- Can full or partial installment refunds be processed?
- Can refunds require approval and appear on customer statements?
- Can customers change from one unit to another?
- Can all payments automatically transfer to the new unit?
- Does the system calculate additional payments or refunds after a unit change?
- Does the old unit become available automatically?
- Can ownership be transferred from one client to another?

- Can a complete ownership history be maintained?
- Can contracts be amended with full history?
- Can sales be cancelled after payments?
- Can cancellation charges and refunds be calculated?
- Can payments be reallocated to another customer, unit or invoice with an audit trail?

16. Other Requirements

- Multi-currency (KES/USD)
- VAT, Withholding Tax & Stamp Duty
- Export to Excel/PDF/CSV
- Advanced search
- System performance and scalability
